**Subject:** Discontinuation of 3M™ Fastener Adhesives

Dear Valued 3M Customer,

As you are aware from our communication sent on August 11, 2023, one of our critical raw material suppliers announced they were closing their operations and would not be able to further supply the critical raw material used in the manufacturing of 3M Fastener Adhesives. Despite our efforts to work with the raw material supplier, we are unable to secure additional inventory. Our supplier's abrupt and unexpected announcement leads us to discontinue production of 3M Fastener Adhesives.

You have been identified as having purchased one or more of these products in the last 18 months, therefore we are notifying you of the discontinuation.

**Impacted Products**

- 3M™ Fastener Adhesive 2353/2353B/2353Y
- 3M™ Fastener Adhesive 2510/2510N/2510R
- 3M™ Fastener Adhesive SG2451J

We are analyzing the availability of our remaining raw materials to fulfill pending orders and will fill them according to historical order volumes subject to material availability. No new orders will be accepted.

Thank you for your continued support of 3M Automotive Bonding and Joining Solutions products.

Sincerely,

Sincerely,  
Hiroyuki Ishizaki, Vice President - Global Portfolio  
3M Automotive and Aerospace Solutions Division
